PIONEERS OF INDOOR AIR QUALITY SOLUTIONS.

AT SANTA FE, WE ARE FOCUSED ON THE FRONT LINE IN DEFENSE – THE BIG 3: DEHUMIDIFICATION, FILTRATION AND VENTILATION.

DEHUMIDIFICATION

When a home has too much moisture, it becomes a breeding ground for pests and a trigger for indoor pollutants such as dust, pollen, mold spores and bacteria. It can put the home's structural integrity, as well as the occupant's comfort, at risk.

Our innovative dehumidifiers properly maintain humidity levels – regardless of how hot it is outside and how much moisture is already in your home. At the same time, our superior filtration helps remove indoor pollutants.

VENTILATION

Santa Fe's Ultra Series whole house ventilating dehumidifiers provide the additional benefit of outdoor mechanical supply ventilation that is filtered through a MERV-13 filter.

INDUSTRY-LEADING WARRANTY.

To say we stand behind our products is an understatement. While most manufacturers offer only a 1-year warranty, every Santa Fe dehumidifier is backed with an industry-leading 6-year warranty.*

FILTERED TO THE HIGHEST STANDARDS OF FRESH.

Over a 6-year period, MERV-13 filters will remove two pounds of dust, pollen, mold spores, pet dander, and bacteria from the air in a home.** In comparison, big-box units have MERV-4 or washable filters, which only remove 7 ounces of material from the air over the same period of time.

* The UltraMD33 carries a 4-year warranty.

** Based on regularly changing your air filter: see instructional manual for more information.

Small but tough, the **Compact Series** and **Advance Series** fit into tight spaces where other dehumidifiers simply can't. Extremely powerful and efficient, they tackle excess humidity to curb harmful mold growth in the harshest of conditions.

The **UltraMD33** is the first true in-wall dehumidifier. Featuring a tamper-proof cover, this unit runs independently of the HVAC system and creates a comfortable, healthier living environment for residents. Ideal for apartments, ductless mini-split applications, basements, and other space dehumidification needs. The MD33 can also be installed on a wall with the Surface Mount Kit and partially through a wall with the Bezel Kit.
